

What will 2019 be like---

for the environment, for business and for you and your family?!

Sign up for the Feng Shui Workshop (Year of the Pig) with Grandmaster Hong to hear the 2019 Forecast and take action to make the most of the year!

Feng Shui is about understanding the elements and cycles affecting the Earth, the Environment, the Economy, and even our Health and Body. The Earth has many cycles -- 10 year, 12 year, and most obvious, the 4 Seasons cycle. Our bodies have cycles such as the 24-hour Circadian Rhythm proven by the 2017 Nobel prize winners.

In 2018, based on the elements and cycles, the forecast was for excess Fire in our environment, and we saw as an example, volcanic eruptions in Hawaii, California having the worst fire season on record, and the US having the 4th warmest summer on record. 2019 is forecast to be "weak soil" with increases in landslides, sink holes, and flooding. In business, the forecast shows risk in financial, stock market, real estate and petroleum. 2109 looks to have an increase risk of diabetes, kidney disease, digestive issues, cardiovascular issues, Alzheimer's and depression.

With an understanding of the cycles, you can prepare and deal with the changing forecast. In this workshop, we will discuss how each individual can take control and have a positive impact on their lives. The cycle of the 12 Chinese animals shows that in 2019 the **PIG, TIGER, SNAKE,** and **MONKEY** need to actively adopt Feng Shui remedies to deal with adverse energy in this year's cycle. **RABBIT, SHEEP, HORSE, OX, AND RAT,** on the other hand, have good luck in 2019, and should come to the workshop to learn how to capitalize on that good fortune. **DOG, ROOSTER,** and **DRAGON,** your luck is mixed in 2019; learn how to avoid the unlucky and find success.
